

Dietary Supplements

As more and more dietary supplement companies source their raw materials abroad, the need for comprehensive quality and safety programs has intensified. Media attention and consumer concerns, coupled with heightened U.S. regulatory scrutiny, means the stakes are very high for the dietary supplement industry. STR helps companies achieve the highest level of credibility and quality for their products. Using proven programs, we work with companies to implement quality and safety improvements, monitor ongoing product quality and develop a proactive approach to regulatory compliance.

STR Dietary Supplements testing delivers unparalleled quality solutions no matter where you source in the world:

- Testing to determine compliance to DSHEA, USP and the FDA GMPs for potency, purity and stability
- Quality assurance programs
- Microbiological studies
- Stability studies
- SOP development and implementation
- cGMP facility audits
- Method development and validation
- Label reviews
- Regulatory consultation

What distinguishes STR's Dietary Supplements Testing:

By developing dietary supplements test methods and standards, STR leads the industry and we use that expertise to effectively meet client needs.

STR Works For You

Strategically located throughout the world with laboratories and inspection and auditing offices on six continents, we provide testing, audit, inspection, and responsible sourcing services. STR helps clients mitigate supply chain risks and achieve product success in the global marketplace.

Raising the world's expectation of product quality, safety and supply chain responsibility
