

Electrical & Electronic Products Testing

Ensuring the quality and performance of your electrical and electronic products is essential to bringing successful products to market. Consumers expect safe products that comply with industry regulations and work the way they are supposed to everyday. With operations in key producing countries, STR is a premier resource for conducting quality assurance testing and inspections on consumer electrical products. Our laboratories are equipped to test consumer electronics, household electrical appliances, power tools, and lighting. We help companies comply with changing regulatory and industry requirements around the world.

STR Electrical Testing delivers unparalleled quality solutions no matter where you source in the world:

- Testing to international standards
- Product safety evaluations
- Durability and life testing
- Comparative products testing

What distinguishes STR Electrical Testing:

By maintaining a close relationship with Underwriters Laboratories, we are able to reduce time-to-shelf across product categories, help protect your brand and provide global market access.

STR Works For You

Strategically located throughout the world with laboratories and inspection and auditing offices on six continents, we provide testing, audit, inspection, and responsible sourcing services. STR helps clients mitigate supply chain risks and achieve product success in the global marketplace.

Raising the world's expectation of product quality, safety and supply chain responsibility
