

General Merchandise Testing

When it comes to general merchandise, everyone has a price point – the manufacturer, the buyer, and the consumer. However if the product does not perform, it will not be successful no matter what the cost. STR's product testing can determine how well your product performs under the best and worst circumstances. Our unmatched technical knowledge allows us to measure precisely against strict quality and safety standards and adapt to changing legislation, while still meeting rigid time constraints.

STR Product Testing delivers unparalleled quality solutions no matter where you source in the world:

- Product/supply chain risk assessment and consulting
- Testing to national and international standards
- Product evaluations for safety, performance, design, and construction
- Review of packaging and labeling
- Toxicological testing
- Factory capacity and capabilities audits
- QA Inspections
- Responsible sourcing assessments
- Consumer panels and focus groups

What Distinguishes STR General Merchandise Testing:

We partner closely with our clients to develop Quality Assurance Programs that meet the client's specific quality, safety and timing needs.

STR Works For You

Strategically located throughout the world with laboratories and inspection and auditing offices on six continents, we provide testing, audit, inspection, and responsible sourcing services. STR helps clients mitigate supply chain risks and achieve product success in the global marketplace.

Raising the world's expectation of product quality, safety and supply chain responsibility
