

Manufacturing & Social Audits

A factory's ability to deliver a quality product while being fair to its workers and the environment is now an essential part of a viable brand. By ensuring your business partners share your operational, social and environmental values, you can manage risk to your brand equity. An STR audit leaves nothing to chance. It assesses all the critical points in the sourcing process to help ensure a factory meets quality, safety, legal and social standards while making certain they have the best ability to produce your product.

STR Audits deliver unparalleled quality solutions, no matter where you source in the world:

- **Factory capability audit** – Assurance that manufacturing capacity, quality requirements and scheduling can be met.
- **Social assessment** – Evaluation of labor standards, environmental health and safety, and legal and ethical responsibilities in factories and on farms.
- **Good Manufacturing Practice (cGMP) audit** – An assessment of best practices as they relate to methods, equipment, facilities, production controls and particularly regulated industries such as food, pharmaceuticals, medical devices and cosmetics.

What distinguishes STR Audits:
With custom audit tools, consumer product expertise and experienced auditors in all the major producing countries, STR can effectively audit every aspect of the production process.

STR Works For You

Strategically located throughout the world with laboratories and inspection and auditing offices on six continents, we provide testing, audit, inspection, and responsible sourcing services. STR helps clients mitigate supply chain risks and achieve product success in the global marketplace.

Raising the world's expectation of product quality, safety and supply chain responsibility
