

Pharmaceuticals Testing

Potency, purity and quality are the key drivers of success in the pharmaceuticals industry.

With companies increasingly sourcing their raw materials abroad, STR helps ensure the quality of ingredients by testing the raw material close to the production source. Our broad spectrum of services, state-of-the-art facilities and expert staff of regulatory affairs consultants, microbiologists and chemists helps companies achieve the highest quality and safety standards.

STR Pharmaceuticals testing delivers unparalleled quality solutions no matter where you source in the world:

- Analytical testing
- Pharmacopeia testing to USP, EP, and JP standards
- cGMP audit services
- SOP development and implementation
- Method development and validation
- Accelerated and ambient stability testing
- Disintegration and dissolution testing
- Raw material testing
- Antimicrobial preservatives effectiveness studies
- Antibiotic assays
- Sensory panels

What distinguishes STR's Pharmaceuticals Testing:

Our end-to-end services for pharmaceuticals testing, world-class facilities and stability chambers, and personalized services uniquely position us to meet client needs.

STR Works For You

Strategically located throughout the world with laboratories and inspection and auditing offices on six continents, we provide testing, audit, inspection, and responsible sourcing services. STR helps clients mitigate supply chain risks and achieve product success in the global marketplace.

Raising the world's expectation of product quality, safety and supply chain responsibility
